SIGNWRITERS

introduction

This handbook is a guide to some of the most popular types of lettering and scripts offered by Astley signs. It also illustrates some of our recent installations. Since our establishment in 1918, we have acquired a deep knowledge of signs and display lettering. Whatever the nature of a business, we can provide a sign which will establish a clear and appropriate public image. Here is an outline of Astley's comprehensive service.

LETTERING Astley can reproduce modern and old-established alphabets with the advantages of modern materials and finishes. We also have our own design staff who will devise individual signs.

MATERIALS Astley are experts in Neon and Cold Cathode Tube making, letter building in wood, metal and plastic, finishing, screen printing, signwriting and gilding. All metal letters and boxes are stove enamelled after rust inhibiting treatment. High quality and craftsmanship are strictly maintained.

INSTALLATION Astley can carry the whole job through to the installation of the sign. We have our own joiners and erection staff. There is no need to employ a separate contractor for electrical signs. Astley have high-tension and mains electricians to deal with all the wiring connected with illuminated displays.

SERVICE Astley can provide a guaranteed maintenance service to keep your signs in first-class condition. A rental maintenance service is also available on a quarterly basis. Repairs can be made to all types of signs and letters within a reasonable distance of our works. This wide experience of signs, from design to maintenance sets Astley service in a class apart. It can offer you the best sign for your business and the best sign for your budget . . . two strong reasons for consulting Astley Signs.

Raising a 30 foot sign 100 feet high, on the Cyril Lord Textile Factory near Oldham presented some interesting problems to Astley installation engineers. Our front page shows this sign in action at night.

MARK DOWN

An example of illuminated plastic fascia with fret cut applied letters.

The windows above are lettered in 23 carat gold leaf with black outline.

This work was executed on site by our signwriting department.

LADYBIRD

This trade name, manufactured and erected by Astley Signs is placed

60 feet high on a mill tower and consists of box section metal letters with superimposed neon tubing.

An interesting feature of this sign is the permanent maintenance scaffold which forms part of the structure.

EQUITY HOUSE

Stalybridge Co-operative Society making use of non illuminated signs by box section metal letters with beaded edge. Painted in contrasting colour.

Manufactured and erected by Astley Signs.

TYPE FACES

There is an extensive range of type faces for signs, some more applicable to certain subjects than others. Our design team and technical representatives are at your service whatever your requirements — a telephone call is all that is needed.

EGYPTIAN EXTENDED

a b c d e f g h i j
k l m n o p q r
s t u v w x y z

Crown wallpapers use an off white laminated plastic background with the word "Crown" of built-up metal letters finished in gold leaf. The lower lettering is fret cut black plastic. This sign is illuminated by fluorescent tubes concealed by a canopy above the sign face.

A SELECTION

of type faces available is shown on the following pages. These represent only a few of the many lettering styles popular to-day.

SANS CONDENSED No. 14

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
a b c d e f g h i j k l m n o p q r s t u v w x y z

The size of letter, together with the material and type face used must be considered as a manufacturing proposition.

ELONGATED ROMAN

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

Not all letter styles lend themselves to being manufactured in certain materials or below a certain letter size.

PLAYBILL

A B C D E F G H I J K L O P Q R S T U V W X Y Z
a b c d e f g h i j k l m n o p q r s t u v w x y z

Astley technical staff are fully conversant with sign problems and their ultimate solution.

SPECIAL STYLES

In addition to the standard range of typefaces trade mark or house styles can be copied and reproduced in a variety of materials.

CLARENDON

OUR DESIGN STAFF

are available to produce drawings for your approval or to work from customers own scale drawings.

This 5' x 4' projecting metal box sign has black plastic fret cut letters. The club title only having a gold leaf bevelled edge. Frame to "Beverleys Beers" is fret cut plastic, painted to simulate cane. The palm tree motif is painted direct on to the white background panel. Illumination is by cold cathode.
